

Electrix is open for business today.

We are operating within the CDC recommended enhanced infection control strategies. Our facilities provide ample space to accommodate required social distancing and we carry more than the required inventory of components to prevent disruption of material shipments.

As is the case with many of our customers, collaborative partners and colleagues, we are actively monitoring updates regarding (COVID-19) at both the National and State levels.

Our primary concern is the well-being and safety of everyone in the Electrix Network.

As a company we are continue to take the following onsite actions:

- Deploy enhanced cleaning protocols particularly in common areas, with alcohol based cleaning agents.
- Operate an increased frequency in our cleaning schedules.
- Establish increased sanitization stations, with alcohol-based sanitizers.

We continue to evaluate our facilities and add additional preventive protocols as necessary to ensure the safety of our clients, our team and communities.

In response to the potential exposure to (COVID-10) outside our facilities:

- We have suspended all business travel, all meetings and presentations will be virtual, until further notice.
- Other than inbound deliveries and outbound shipments, our facilities are open to employees only.

For all those affected, either directly or indirectly by this health crisis, our thoughts are with you.

We will continue to review and evaluate our status on an ongoing basis and will keep you informed on any additional developments.

Thank you,

Dwight Kitchen
President & General Manager
